

# Contractor Performance Assessment Reporting System (CPARS)

---

*A 1-Day Hands on TMS Experience  
Delivered in Live or Live Virtual Classrooms!*

## **Course Description:**

CPARS collects and records data on contracts throughout the government. Having accurate, detailed records of contractor accomplishments impacts on option period approval, future source selections, and any financial claim. Contractors are very focused on their CPARS scores since good scores result in more business, but this means you need solid evidence for low CPARS ratings. CPARS went through major changes in 2016 and 2018 and now includes the Past Performance Information Retrieval System (PPIRS) and architect or engineering work previously contained in separate systems.

This workshop provides the legal and process basis for arriving at the proper CPARS rating using information provided by Contracting Officer's Representatives (CORs), Government POCs, and other officials through the Contracting Officer's Representative Tracking (CORT) Tool system. An experienced instructor leads participants through effective techniques to create and review effective CPARS documentation and narratives in class.
